

BD-200 Kinetic Green Leaf SD Simple Digital Thermostat

Product overview

The BD-200 is a simple digital thermostat with a full LED display and touch sensitive operated glass screen for touch control.

This sleek and smooth thermostat can be used to call for heat, control zone valves, switch electric underfloor heating systems, and connect to a UFH wiring centre.

This simple thermostat includes “Green Leaf” ECO mode which can be set to reduce the set temperature to what the end user wants.

Clear large central numbers show the current room temperature with the set temperature shown smaller below.

The BD-200 has the options to run an external sensor for remote sensing, or the ability to run both sensors (internal and external) for floor protection modes.

Technical specifications	Dimensions	88x88x12mm	Product code	CWS-SDT1-200 (201)
	Weight	152g	Item	230V simple digital thermostat
	Material	PC+ABS	Feature	One touch ECO mode
	Supply Voltage	230V	Colour	White 200, Black 201
	Power Consumption	<1.5W	Includes	Remote Sensor Probe NTC 10K
	Max switching output	16A	Mounting	In wall (35mm backbox depth)
	Switch relay output	230V	Compliance	UKCA and CE
	Protection rating	IP20		
	Settable Temp	5-35 °C		
	Display Accuracy	1°C
